RESEARCH & DEVELOPMENT

LASER Deeptone exhaust systems have been known very well for years in the world of rallye and racing.

The same R&D department that develops the sports exhausts for the top World Championship teams in car and bike racing has now developed this very special scooterer exhaust, the **LASER X-PRO**.

A combination of hi-tech and racetrack experience in car and bike sports makes the **LASER X-PRO** a scooterer exhaust unequalled in finish, looks and performance.

PERFORMANCE INCREASE

For each type of engine a special **LASER X-PRO** has been developed seperately in order to get a maximum power output combined with better torque characteristics.

Extensive dynotests at our testing facility and real world testing have resulted in optimized performance for each type of engine.

The **LASER X-PRO** performs very well on 50cc, fast 50's as well as 70cc cylinders

HIGH QUALITY MATERIALS

Only the cream of the crop in materials is good enough for the **LASER X-PRO**. The endmuffler is crafted from the finest polished stainless steel, and the conical part is made from special mild steel, finished with a thick layer of transparent lacquer to establish an excellent look.

Even the moveable mounting brackets are galvanised for a good lastability and a hi-tech finish.

The muffler material has its origins in the world of motorcycle racing. The material is being used for the **LASER Works** racing systems.

Specially developed, the relatively long muffler design of the **X-PRO** decreases noise to an acceptable level, whilst still maintaining a racey sound and performance.

HAND MADE TOP QUALITY

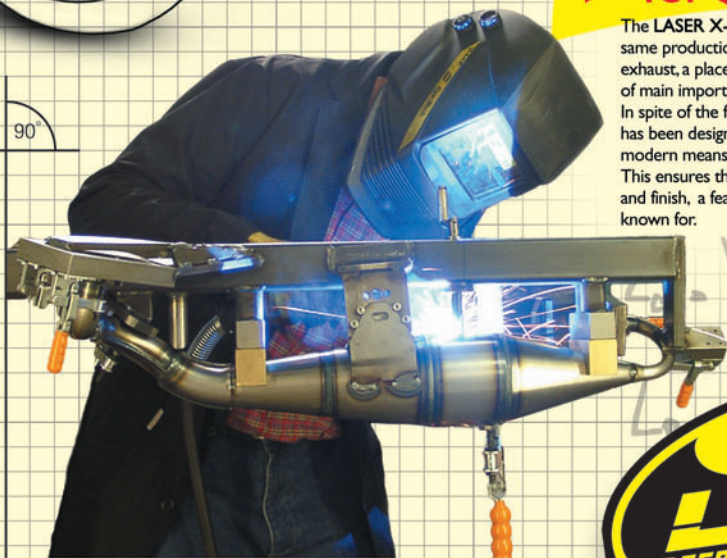

90°

The **LASER X-PRO** is being manufactured in the same production plant as the car- and motorcycle exhaust, a place where quality and craftsmanship is of main importance and motivation.

In spite of the fact that the **LASER X-Pro** exhaust has been designed and developed with the most modern means, it is crafted by hand.

This ensures the highest possible level of quality and finish, a feature that **LASER** exhausts are well known for.

SCOOTER EXHAUSTS

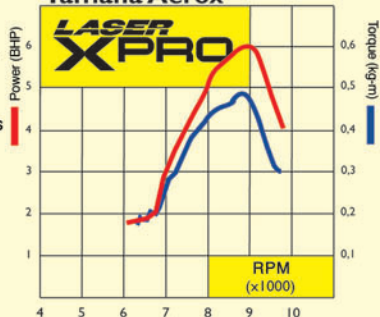

XPRO SPECIFICATION

MINARELLI HORIZONTAL ENGINE

Features ▼

This LASER X-PRO scooter exhaust provides excellent performance. We have realised a power increase of 50 percent resulting in an enormous gain in top speed. These massive improvements are valid for all scooters with a Minarelli engine. Other features of the LASER X-PRO are the increased ground clearance and the bodywork clearance of concerning scooter. Easy mounting and racey looks make this pipe a winner.

Yamaha Aerox

Suitable for ▼

- ▶ **Aprilia:**
 - ▶ SR lc (tot 2000)
 - ▶ SR ac (va 1998)
 - ▶ Rally
- ▶ **Benelli:**
 - ▶ 491
 - ▶ K2
- ▶ **Beta:**
 - ▶ Ark
 - ▶ Quadra
 - ▶ Ycon
- ▶ **Italjet:**
 - ▶ Dragster
- ▶ **Malaguti:**
 - ▶ F12
 - ▶ F15
- ▶ **Yamaha:**
 - ▶ Aerox
 - ▶ Neo's
 - ▶ Why

PIAGGIO ENGINE

Features ▼

The features of the "Piaggio" X-PRO match the "Minarelli" one. A power increase of 50 percent, a higher top speed and a much better acceleration cater for an enormous performance increase. Fitting and ground clearance have been specially adapted and optimized for Piaggio scooters. Due to the above this LASER X-PRO exhaust is the perfect pipe for tuning your 50 or fast 50. It even optimizes power output for 70cc's.

Gilera Runner

Suitable for ▼

- ▶ **Piaggio/Gilera:**
 - ▶ Storm
 - ▶ Typhoon
 - ▶ NRG (mc2/mc3/Extreme)
 - ▶ Zip
 - ▶ Stalker
 - ▶ Runner
 - ▶ DNA
 - ▶ Ice
 - ▶ Zip SP

PEUGEOT ENGINE

Features ▼

Peugeot scooters have specific engine characteristics. They need a lot of torque to perform well. The LASER X-PRO provides 35 percent more torque which enhances acceleration to a large extend. This exhaust rocks upon twisting the throttle. Top speed has increased enormously compared to the standard scooter exhaust. Mounting the LASER X-PRO is very easy. Even on old model Peugeot engined scooters it can be fit, using the special spacer, supplied with the exhaust.

Peugeot Speedfight LC

Suitable for ▼

- ▶ **Peugeot:**
 - ▶ Buxy
 - ▶ Speedake
 - ▶ Vivacity
 - ▶ Speedfight
 - ▶ Elyseo
 - ▶ Looxor
